

NetSolutions Resident & Resource Scheduling

Providing a quick and efficient way to schedule residents' appointments and activities including related resources such as equipment and rooms. Schedules are displayed clearly in calendars and reports for individual residents and prospects, staff, activities, and resources. It organizes schedules, avoids conflicts, and gives staff tools to prepare for appointments.

NetSolutions Resident Scheduling replaces appointment books in various locations throughout your organization with one system that schedules:

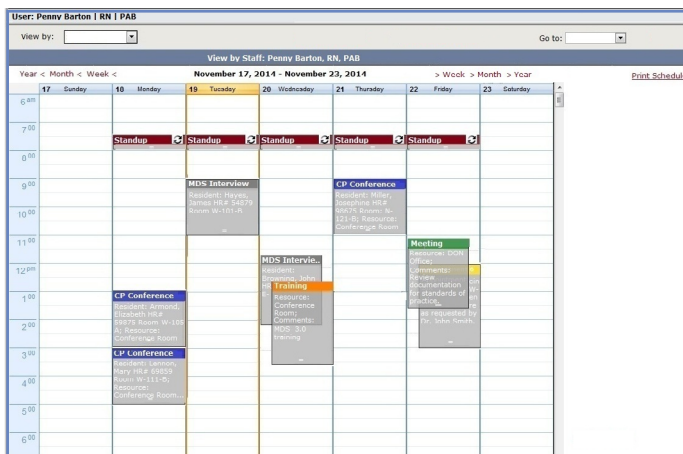

- Appointments for individual residents, such as an MDS interview and physician visit
- Activities with multiple residents, such as a trip to a community event and bingo
- Resources related to an appointment such as equipment, transportation, and specialized rooms
- Recurring appointments

Calendars for Residents, Staff, Resources

Staff members have their own calendar view where you can add, update, and delete appointments. All staff who actively use the system have a calendar available to them.

Calendar boxes include data such as resident information, attendees, location, and your notes.

You can add an appointment by clicking on an empty area of the calendar. In the popup screen you select start and end times using familiar calendar tools, and add staff or resources, such as a van, oxygen tank, and meeting room. Select from dropdown lists to minimize typing.

Filter this handy calendar view for your exact needs – to see a calendar for yourself, a coworker, resident, prospect, resource, or activity. This sample is a nurse's calendar. Choose an activity instead, such as scheduled MDS interviews. Recurring appointments include an icon (see Standup meetings above). Clearly see conflicts in time to resolve them.

The NetSolutions System

Revenue Cycle Management

- » AR-Billing
- » Resident Funds
- » General Ledger, Accounts Payable

Electronic Medical Record

- » MDS 3.0
- » Care Plan
- » Progress Notes

- » SNFQAPI
- » eAssignment & Messaging

Long Term Post Acute Care
 +Skilled Nursing Facility

CCHIT® certification gives you an objective way to select LTPAC software that is secure, complete, and ready for Electronic Health Records.

Schedule Appointments for one Resident or Many

The flexibility of this application means you can schedule one appointment for one resident requiring multiple resources and for multiple residents requiring one or more resources.

For example, to schedule a bingo game, you would choose a date, start and end times, and select residents by using efficient NetSolutions tools. Add a meeting room for the game and any equipment, and click OK. You could also click “Recurring” to schedule the event into the future automatically per your instructions.

To add an appointment you either left double click in a timeslot on a calendar or select the Add Appointment link. When making an appointment, the only required entry is Activity, such as care plan conference, training, bingo, and standup meeting. The activity can be entered from a dropdown list or free-text box. Edit appointments easily from the calendar view or Modify/Remove Appointment page.

Tailor the contents of the dropdowns for resources and activities for your facility in master files.

Reports

A Scheduling Report in list view will be available to view, print and share in pdf format. The reports can be filtered by all or selected residents, prospects, staff, resource, and activity. Reports can be created that limit selections to pinpoint information.

For example the subject of a report could be resource, with Van1 and Van2 chosen and staff members Green and Brown. The resulting report would show only appointments for those staff in those vehicles.

Key Features

- » Resident displays always contain the resident name, ID number, and location (station-room-bed)
- » Displays information related to appointments in calendar including resident, resource, notes
- » Provides a calendar for all staff who actively use the system
- » Offers familiar calendar tools to show different time periods
- » Filters calendar view to show schedules for staff, residents, prospects, resources, and activity
- » Offers dropdown lists that increase efficiency when choosing resources and activities
- » Supports recurring appointments
- » Gives option of using a 24-hour clock
